Press and hold "-" button for 3 seconds to turn off the power.

3. Shake Awake

After 8 minutes of inactivity, the red dot will go into sleep.

Just a slight vibration to wake up the red dot

4. MOS Adapter Plate

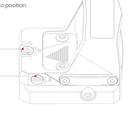

In addition to the Picatinny base thought also comes with a MOS adapter plate, 0.45in footprint compatible to better fit Glock and other pistols slide holster.

Zeroing

With the sight mounted, rest the equipment on a solid support and aim at a target 50 yards away. Test shots should be done in the same conditions to achieve maximum accuracy for adjustment, for which the use of equipment rest for firing is recommendable. Each click adjustment moves the point of impact by 1 MOA (approximately 1/2" x at 50 yards).

Elevation & Windage Adjustment

Adjust the elevation and windage to the zero position.

Notice

Feedback from some customers states that the sights are blurry or ill shows double images. Please don't worry, It just needs 3-5 minutes to preheat when you first use it. (Just turn it on and let it stay for 3-5 minutes). Then it will show clearly.If it still results in the same, please do not hesitate to let us know before you low rating, we will try our best to help you out.

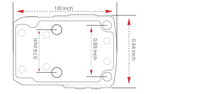

Feyachi committed to the development of cost-effective outdoor tactical equipment, in the pure of cost-effective while providing the highest quality customer service.
